Foxford Learning Plan

YEAR 7

Topic Introduction to Geography and Tectonics

Autumn term

Key Vocabulary

Tectonic	Involves the structure of the earth
Crust	The outer layer of the earth that we stand on
Plate	A large section of the earth's crust
Plate boundary	Where two plates meet
Convergence zone	Where two plates move towards each other
Divergence zone	Where two plates move away from each other
Cause	Something that makes something happen
Effect	A consequence or outcome of the cause
Mantle	The semi-liquid rock below the plates

Key Skills

Over the course of the topic, I will be able to: -

- Analyse sources select relevant information
- Describe processes such as the formation of a volcano
- Give reasons to explain why processes happen
- Know the sequence of events for the formation of key tectonic features
- Show empathy for people that are caught up in natural hazards

I will Understand

1. What is Geography?
2. How is the earth structured?
3. What are plate boundaries?
4. What features can be found at plate boundaries??
5. What are the impacts of living in tectonic areas?
