Key Skills

Over the course of the topic, I will be able to: -
Ask geographical questions about the wider world
Further develop key geographical skills such as mapping skills to facilitate the understanding of a range of sources
Analyse the physical and human features of places from a wider area, such as Iceland
Analyse a range of sources to understand processes within the wider world
Link together physical processes to understand the features of a place

I will Understand

1. How to use a range of key geographical skills within different contexts
2. That a range of processes work together to create features within a place
3. How people are affected by their environment
4. That people adapt to their environment in order to meet their essential needs
5. That people can change their environment in positive and negative ways
