Foxford Learning Plan

YEAR 10

Topic: The Changing Economic World

Spring

Key Vocabulary

Development	
Development gap	The widening difference in standards of living and wellbeing between the world's economically richest and poorest countries (between HICs and LICs).
Fairtrade	
Globalisation	
Industrial Structure	The relative proportion of the workforce employed in different sectors of the economy (primary, secondary, tertiary and quaternary).
North-south divide	
Trade	
Service Industries	
Transnational Corporation	A company that has operations (factories, offices, research and development, shops) in more than one country. Many TNCs are large and have well-known brands.

Key Skills

Over the course of the topic, I will be able to: -

- Consider different indices that might be used to compare levels of development
- Investigate an area of tourism growth. Consider the advantages and disadvantages and evaluate the effectiveness in relation to improving socio-economic conditions.
- Study of the changing economy of the UK to illustrate structural change from an industrial economy
- Investigate the location and characteristics of a modern industrial/business park
- Investigate the changes in one rural location

I will Understand

1. What are the economic causes of uneven development?
2. How the manufacturing industry can stimulate economic development?
3. What are the causes of economic change in the UK?
4. How has industry in the UK changed?
5. The place of the UK in the wider world
